gayurajeev

Professional Summary

Results-driven Industrial Engineering student and aspiring Data Analyst with a strong technical foundation in statistical analysis, data cleansing, and business intelligence. Proficient in translating raw, complex datasets into actionable insights using Python (Pandas, NumPy), SQL, Tableau, and Advanced Excel. Experienced in developing interactive, executive-ready KPI dashboards to monitor operations, workforce dynamics, and sales trends. Combines structured engineering problem-solving with rigorous data storytelling to support strategic business decisions. Seeking a Data Analyst Internship to deliver data-backed value in real-world scenarios.

Technical Skills

- **Programming & Query Languages:** Python, SQL
- **Libraries & Frameworks:** Pandas, NumPy, Matplotlib, Seaborn
- **Data Analytics Methods:** Exploratory Data Analysis (EDA), Statistical Modeling, Data Cleaning, KPI Identification, Trend Forecasting
- **Data Visualization & BI:** Tableau Public, Excel Dashboards, Pivot Charts, Pivot Tables
- **Excel Specializations:** XLOOKUP, Nested Functions, Dynamic Charts, Dashboard Automation
- **Soft Skills:** Data Storytelling, Cross-functional Collaboration, Structured Problem Solving, Operations Research

Data Analytics Projects

Python (Pandas, NumPy, Seaborn, Matplotlib)

Portfolio Project

US Accidents Analysis Pipeline

2025

- Engineered a scalable data cleaning and analysis pipeline using **Pandas** and **NumPy** to process and standardize a massive dataset of over 2,000,000 traffic accident records.
- Programmatically identified and resolved 5,000+ missing values, structural duplicates, and data inconsistencies to ensure analytical accuracy.
- Developed 5+ multi-variable visualizations using **Seaborn** and **Matplotlib** to study correlations between weather severity, road conditions, time of day, and accident frequency.

Python (Pandas, Seaborn), Tableau Public

Portfolio Project

IBM HR Analytics – Employee Attrition Dashboard

2026

- Executed exploratory data analysis (EDA) on workforce demographics using **Pandas** to assess historical turnover rates and calculate core HR metrics.
- Evaluated key turnover drivers—including overtime workload, monthly income distribution, and job satisfaction levels—by generating correlation matrices with **Seaborn**.
- Built and published an interactive **Tableau Public** dashboard containing executive-facing KPIs and custom action filters, enabling HR teams to segment turnover risk by department and role to improve retention strategies.

Microsoft Excel (Pivot Tables, XLOOKUP, Slicers)

Portfolio Project

Interactive Coffee Sales Intelligence Dashboard

2025

- Consolidated, normalized, and modeled over 5,000 raw sales entries from disparate datasets using advanced formulas like **XLOOKUP** and text transformations.
- Designed and deployed a dynamic executive-facing sales dashboard featuring 3 primary financial KPIs, interactive timeline slicers, and interactive sales trend graphs to simplify performance tracking.

Python & Tableau

Portfolio Project

Behavioral Fitness and Activity Analysis

2025

- Conducted detailed exploratory data analysis (EDA) on 10,000+ active personal health and fitness records using **Python** to investigate behavioral health habits.
- Developed an interactive 4-chart **Tableau** dashboard showcasing daily correlations between physical exercise efficiency, sleep duration, and calorie expenditure.

Education

College of Engineering, Trivandrum <i>Bachelor of Technology (B.Tech) in Industrial Engineering, CGPA: 8.7/10</i>	Kerala, India <i>2023–2027 (Expected)</i>
---	---

Leadership & Co-curricular Activities

ASME Student Chapter <i>Volunteer Coordinator</i>	CET, Trivandrum <i>2024–Present</i>
---	---

- Coordinated cross-functional student teams to execute technical workshops, increasing event registration and participation rates by 25% through targeted digital outreach.
- Managed logistically complex schedules and resolved resource allocation bottlenecks, optimizing departmental resource use.
