

GAYATHRY RAJEEV

Industrial Engineering Student | Aspiring Data Analyst

gayathry.rs22@gmail.com | linkedin.com/in/gayathry-rajeev | github.com/gayurajeev | Kerala, India

PROFESSIONAL SUMMARY

Industrial Engineering student with experience in data analysis, dashboard development, and business analytics using Python, SQL, Excel, and Tableau. Worked on projects involving large datasets, exploratory data analysis (EDA), data cleaning, KPI tracking, and interactive dashboard creation. Familiar with Pandas, NumPy, Matplotlib, Pivot Tables, and XLOOKUP for analyzing trends and visualizing business data. Seeking a Data Analyst Internship to apply analytical and reporting skills in real-world projects.

PROJECTS

Python Data Analytics Project – US Accidents Dataset

- Examined 2M+ accident records with Python libraries including Pandas and NumPy to study accident patterns and contributing risk factors.
- Cleaned datasets by resolving 5K+ missing values, duplicate records, and inconsistent data entries before analysis.
- Created 5+ visualizations through Matplotlib and Seaborn to evaluate weather conditions, road factors, traffic timing, and accident hotspots.
- Identified peak accident periods and high-frequency risk conditions through exploratory data analysis.

Excel Dashboard Project – Coffee Sales Analysis

- Processed 5,000+ sales entries through Excel tools including Pivot Tables, Pivot Charts, and XLOOKUP.
- Designed an interactive dashboard containing 3 KPI metrics, 3 charts, and slicers to monitor regional sales and customer purchasing trends.
- Applied filters and chart-based reporting techniques to simplify sales tracking and performance evaluation.
- Determined top-performing countries, products, and monthly sales trends from dashboard analysis.

Fitness Data Analysis using Python & Tableau

- Prepared and evaluated 10,000+ fitness records with Pandas and Matplotlib for data visualization and reporting.
- Investigated activity levels, calories burned, sleep duration, and step count metrics to examine user behavior patterns.
- Built an interactive Tableau dashboard featuring 4 visualizations to track fitness and activity trends.
- Compared exercise, sleep, and calorie expenditure metrics to identify behavioral correlations across datasets.

EDUCATION

Bachelor of Technology (B.Tech) in Industrial Engineering

College of Engineering, Trivandrum, Kerala

CGPA: 8.7/10 | Expected Graduation: 2027

TECHNICAL SKILLS

Programming & Analytics: Python, SQL

Data Analysis: Exploratory Data Analysis (EDA), Statistical Analysis, Data Cleaning, Reporting, KPI Analysis

Visualization Tools: Tableau, Matplotlib, Excel Dashboards

Libraries & Tools: Pandas, NumPy

Excel Skills: Pivot Tables, Pivot Charts, XLOOKUP, Dashboard Development

Business Skills: Business Analytics, Data Visualization, Problem Solving

LEADERSHIP

ASME Student Chapter – Volunteer Coordinator

- Coordinated technical events and managed student participation for department activities.
- Collaborated with teams to organize workshops and improve event execution efficiency.
- Developed communication, leadership, and team management skills through student coordination activities.
